

ABSTRACT

A fuse status indicator assembly (40, 41, 42) for insertion in an opening (31) in a side wall of the fuse cartridge (20a, 20b, 20c) including a fuse (35) has a snap-in removable carrier (41) in the event that the bulb (42) has burned out and must be replaced. Labels (22) are attached to the fuse cartridges (20a, 20b, 20c) to identify the circuits and ratings of the fuses (35).
